## **4) Revenue Projection Model (3-Year Plan)**

নিচের মডেলটি **conservative + scalable**; আপনি চাইলে সংখ্যা পরিবর্তন করে আমি ফাইনাল এক্সেল-মডেল স্টাইলে সাজিয়ে দিতে পারি।

## Key Assumptions

- Card Price: 100,000 BDT
  - Direct Cost per card (metal card, packaging, ops): 3,000–6,000 BDT
  - Marketing + event cost: Year 1 heavier
  - Renewal option: Year 2 থেকে 60–70% renew (strategy dependent)
- 

## Scenario A (Conservative)

Year 1: 300 cards

Revenue =  $300 \times 100,000 = 30,000,000$  BDT

Year 2: 500 cards + 50% renew of Y1 (150)

Total cards billed = 650

Revenue = 65,000,000 BDT

Year 3: 800 cards + 60% renew of Y2 (390)

Total billed = 1,190

Revenue = 119,000,000 BDT

3-Year Total Revenue: 214,000,000 BDT

---

## Scenario B (Growth)

Year 1: 500 cards = 50,000,000

Year 2: 1,000 cards + 60% renew (300) = 1300 billed → 130,000,000

Year 3: 1,500 cards + 65% renew (845) = 2345 billed → 234,500,000

3-Year Total: 414,500,000 BDT

---

## Profit Structure (High-Level)

Profit = Revenue

- Card production & fulfillment
- Partner settlement (if any)
- Marketing/events
- Team/operations

**Gross margin usually very high** কারণ ডিসকাউন্টগুলো পার্টনার অফার; আপনার প্রধান কস্ট হবে অপারেশন + মার্কেটিং + পার্টনার ম্যানেজমেন্ট।

---
